

## **SOER 2013-1 OPERATOR FUNDAMENTALS**

13<sup>th</sup> to 15<sup>th</sup> September 2022, Oskarshamn 3 NPP, Sweden

The Workshop will be organised by WANO Paris Centre in collaboration with OKG, Oskarshamn, Sweden.

Recent WANO reports and analysis continue to indicate that action is required to address operator performance issues. Events and Peer Review data continue to identify longstanding issues that have not been adequately addressed. SOER 2013-1 was intended to address these issues but the recommendations remain to be sustainably implemented.

### **Topics**

Events, AFIs and SOER implementation evaluations indicate three main focus areas with regard to Operator Fundamental weaknesses and WANO Paris Centre members:

- Shortfalls in control room monitoring, plant monitoring and alarms management
- Failure to precisely control plant operations and evolutions
- Weaknesses in shift crews not working together as a cohesive team

### **Objectives of the Workshop**

Participants are encouraged to come to the workshop prepared to share their challenges and experiences at their site.

Through sharing information, WANO perspectives and member testimonies, it should be the objective of each delegate to take away from the workshop at least one improvement technique or practice that they will implement at their own site.

### **Break-out sessions**

Breakout sessions will be used to analyse a variety of event scenarios, their causes, contributors and which Operator Fundamental recommendations were inadequately implemented.

### **Target group**

Operations Management, including Shift Managers, Control Room Supervisors and Simulator Supervisors from WANO Paris Centre members, with an Operator Fundamental AFI, and a mandate from their NPP to improve Operator Fundamentals.

### Arrival and Departure

Participants should arrive at the hotel on the evening of Monday 12<sup>th</sup> September. An evening reception dinner will take place on Tuesday 13<sup>th</sup> September.

The workshop will end at 13:00 on Thursday, which should be the earliest time to depart.

### Pre-Work

Some pre-work will be required by participants to review a selection of event reports from other locations and carry out some self-evaluation of the current situation at their own station.

## INFORMATION

13<sup>th</sup> to 15<sup>th</sup> September 2022, Oskarshamn 3 NPP, Sweden
