
The workshop is organised by WANO Paris Centre in collaboration with CEZ in Dukovany, Czech Republic.

Effective Leadership and Management during times of change Workshop

2nd – 4th June 2025, Dukovany, Czech Republic

WANO Paris Centre is pleased to announce a face-to-face workshop on Effective Leadership During Times of Change, sponsored by Dukovany NPP.

The world around us has changed, the world of work has changed, working with multi-generations can be a challenge and our global industry is balancing new nuclear construction sites, decommissioning power stations and steady state generation. There is an even greater and essential focus on our people and doing more with less.

The success and effectiveness of leadership relies heavily on the ability of the Managers and leaders at all levels to engage their teams in the actions for excellence, creating the right environment of trust, teamwork, empowerment and mental fitness. Leading motivated teams and ensuring that the highest international standards of nuclear safety are implemented through the organisation and individual behaviours in a forever changing landscape – this is the background to the workshop.

Target group

The workshop is suitable for senior and executive leaders in a nuclear power plant or a Corporate Organizations, that are in a leading position to enhance Organizational Performance in terms of Safety Culture, Operational Safety and Performance, Organizational Learning and Continuous Improvement.

Objectives of the workshop

The aim of this collaborative workshop is to share experiences of successful leadership behaviours, during times of change and learn from experts inside and outside the nuclear power industry. The workshop will help delegates focus on how practical positive leadership behaviours can support continuous improvement and greater operational safety and performance.

Topics

Topics will be facilitated by high-level speakers and facilitators from inside and outside the nuclear industry and include:

- What do we mean by change, the impact it has on us all and the changes needed to thrive
- What does good leadership look like in the Nuclear Industry? Learn more about the leadership behaviors (**WANO 2019-01: Nuclear Leadership Effectiveness Attributes**) that drive best performance and support Staying on Top Values (**INPO 19-003**)
- Effective Leadership – learn and practice using the key skills required to deliver positive change and maintain high performance
- Transformational Leadership – when all around you is changing, how can you ensure that your people are right behind you, motivated and inspired to follow you every step of the way?
- Learn and practice a collaborative problem-solving technique to help each other find solutions to business problems
- Learn from other high-risk industries about creating the right culture to deliver high safety performance and credibility

Should you wish to share the experience of Effective Leadership During Times of Change from within your company, please inform us via the registration form, we will discuss it together prior to the workshop.
