

## FIRE SAFETY WORKSHOP

19<sup>th</sup> – 23<sup>rd</sup> of April 2021, by Microsoft ZOOM meeting

**This activity will not be performed in the form of a physical meeting as initially planned. Instead, it was re-shaped into an on-line event. Registration to this modified version is opened.**

**The Workshop will be organised by WANO Paris Centre in collaboration with WANO Moscow centre.**

### Objectives

The WANO Performance Objectives and Criteria (PO&C) have been subject to a revision, the version *PO&C 2019-1* was issued in October 2019. A new Fire Safety objective was added in order to focus on general staff behaviours. WANO strongly encouraged Members to use PO&C for their self-assessment.

This Fire safety remote workshop should contribute to facilitate the understanding and the exchanging views on how the Performance Objectives can be reached in Fire safety.

### Topics

Currently, there is not yet a common international criteria for categorisation of the fire events neither for reporting these events to WANO. The lack of feedback information does not give the opportunity to learn from each other, neither to share experience and good practices.

WANO information about fire safety is exclusively coming from the AFI found during the Peer reviews. Specific data explaining what kind of fire events occur in the plants and how they were fixed is missing.

**The workshop will be organised in two parts.**

**The topics for the First part (19, 20 and ½ day on 21<sup>st</sup> of April) should be focused on:**

- **Exchanging information about the criteria used by the Members for categorisation and reporting of fire events.**

**The topics for the Second phase (Second ½ of 21<sup>st</sup>, 22 and 23<sup>rd</sup> of April) should be focused on:**

- **Operation experience ( events occurred) during operation or maintenance of the automatic systems for Fire protection; Existing analyses of their effectiveness in ensuring fire safety**
- **On site Fire protection activity using electronic equipment (servers, control panels, data centres, etc.) in the rooms where the presence of workers is constant.**
- **Fire loading Management (permanent and punctual surveillance) and organisation of the Fire protection activities on site; Compensatory measures in case of unavailability of permanent disposal**

It is mandatory for the participants to **conduct a pre-work** preparing a few slides.

For the first part of the meeting, please use the following template to prepare your slides describing your specific local criteria:

1. Name of the Presenter; NPP
2. Explain in one slide, how fire events were categorised and reported (e.g major fire...)
3. In few words, define and present the categorisation of fire events currently in place in your organisation (major fire is .....
4. Give criteria being met for each fire event categorisation (e.g for major fire : High intensity fire with propagation and significant duration before extinction.)
5. Give an overview of the occurred fire events during the last 2 years

The presentation should be prepared and delivered by a NPP representative. If Corporate have defined **internal rule for categorisation of the fire events for all the NPP fleet**, the presentation should be done by a Corporate representative. **We look for a divers presentations covering all the current practices. Every company or NPP represented by a participant in the workshop has to prepare a presentation.**

The presentations have to be proposed to the WANO facilitators before the event.

WANO will confirm the registration after receiving proposed slides for a speech.

The WANO Facilitating Team will held preparation work: to examine all the proposed presentations and to select these to be included in the workshop agenda.

All the proposed presentations will be sent to every participant.

### **Break-Out Sessions**

The participants will be assigned in one of the 3 or 4 virtual rooms. It will make space for discussions and exchanges about presented practices in categorisation criteria of fire events. Each group will provide proposal and definition of decided common criteria during the breakout session.

### **Target group**

The event will provide a platform for experience exchange and networking among the representatives of WANO Paris and WANO Moscow Centre members.

To assure constructive exchanges, expected attendance is of approximately 30 delegates (minimum 20, maximum 35), aiming Fire safety managers that directly report to the Plant Manager or Station Director.

The final numbers of participants from Moscow Centre and from Paris centre has to be equitable.

In case of multiple demands, no more than 1 participant per NPP will be accepted, in order to have a good representativeness of different Members.

The workshop will be facilitated by WANO professionals / facilitators:

The workshop will be mentored by a Senior Management representative from WANOPC Member, in order to provide, throughout the discussions, reference, support, understanding, insights and vision

## INFORMATION

### Workshop language

The workshop language will be English. Simultaneous translation services from English to Russian and from Russian to English will be provided during the workshop including the breakout sessions, by the Attendees Company or/and by WANO Moscow.

### Register on-line

Registrations should be completed online before **23<sup>rd</sup> of March 2021** at the following web address: [www.wanopariscentreregistrations.com](http://www.wanopariscentreregistrations.com)

A confirmation letter will be sent to each participant following their registration. WANO will confirm the final registration after receiving proposed slides for a speech.

The electronic versions of the presentations (MS Power Point slides) should be sent **before 30<sup>th</sup> of March 2021 to the Organising team.**

### Venue

The workshop will be organised remotely. A Microsoft ZOOM invitation will be sent to the confirmed participants.

### Workshop package

There is no workshop package fee. WANO Paris centre will cover the costs for the full workshop documentation.
